

In reference to proceeding 04-233, I wish to petition against giving preference to Low Power FM transmissions over radio stations aired via FM translators, like K-LOVE. In our area, K-LOVE FM 87.9, serves the local community of Midland, TX incalculably. In an age when most radio stations are providing messages that are destructive to our youth, K-LOVE provides a positive, clean alternative. This station also provides a community bulletin board as a public service to alert listeners to happenings in our area of interest to their listeners. If K-LOVE were to be displaced by an LPFM transmission or other programming, we would lose a very positive influence on our community. The service provided by K-LOVE is in the public interest as it provides a moral, socially positive message for both kids and adults that ultimately discourages behaviors that are destructive to society. Please, do not favor LPFM over FM translator stations as this move could harm socially-responsible programming such as K-LOVE.
